Features.

1) This is a very convenient type of lens that allows the wearer to focus on objects both at close range and far range through a single lens. -top" (FT) or "straight-top" (ST) bifocals.

2)This type of lens is designed to enable viewing of objects in the distance, at close range and in the intermediate distance with corresponding changes in power for each distance.

The Advantages Of Round Top Lenses.

The wearers can see the near things by the round shape and see the distance things by the rest of the lenses.

The wearers don't need change two different visions

AR Coating.

--HC(hard coating): To protect the uncoated lenses from scratch resistance

--HMC(hard multi coated/AR coating): To protect the lens effectively from reflection, enhance functional and clarity of your vision

--SHMC(super hydrophobic coating): To make the lens waterproof, antistatic, anti slip and oil resistance.

glasses when they both reading book and watching TV.

The wearers can keep the same posture when they look both the near thing or far thing.
