

## Overview

Place of Origin:	Jiangsu, China
Index	1.61
Lenses Color:	Clear, Clear
Vision Effect:	Single Vision
Brand Name:	kingway
Certificate:	CE/ISO
Lenses Material:	MR-8
Coating:	UC, HC, HMC

Whatsapp,Skepe,Wechat, Email

## Packaging & Delivery

Selling Units:	Pairs
Single package size:	50X45X45 cm
Single gross weight:	About 22kgs
Package Type:	inner bag,out carton, export standard or upon your design
Lead Time :	Quantity(Pairs) 1 - 5000prs, 10days
	Quantity(Pairs) > 5000prs, To be negotiated

## 1.61 MR-8 single vision optical lenses HMC

Index	Monomer	Abbe value	Specific Gravity
1.61	MR-8	33	1.34
Transmission	Diameter	Coating	Power range
>97%	65/70mm	HMC	0.00~+-15.00/0.00~-6.00

## Features.

1. Index 1.61 lenses are thinner than Index 1.499,1.56 lenses. Compared to Index 1.67 and 1.74, 1.61 lenses have higher abbe value and more tintability.
2. The material of MR-8 is imported from Korea, has superior performance. It can meet FDA standard, pass the falling spere test, so 1.61 lenses have igher resistance to scratches and impact.
3. High index lenses are much thinner due to their ability to bend light. As they bend light more than an ordinary lens they can be made much thinner but offer the same prescription power.

## Aspherical Design.

Aspheric eyeglass lenses allow for crisper vision than standard spheric lenses, mostly when looking in other directions than the lens optical center. Not related to the optical quality, they may give a thinner lens, and also distort he viewer's eyes less as seen by other people, producing better aesthetic appearance.

## AR Coating.

--HC(hard coating): To protect the uncoated lenses from scratch resistance

--HMC(hard multi coated/AR coating): To protect the lens effectively from reflection, enhance functional and clarity of your vision

--SHMC(super hydrophobic coating): To make the lens waterproof, antistatic, anti slip and oil resistance.

### UV400 .

---UV+400cut technology filters out not only UVA&UVB, but also high-energy visible light(HEV light) of 400nm-420nm

---Latest reasearch has shown that blocking UV and HEV light is critical for protecting eyes against cataracts and age-related macular degeneration(AMD).

---We are still exposed to 60% of Ultraviolet rays on cloudy days and 20%-30% on rainy days. Our blue cut lens can provide protection under all weather
