

#### Overview

Place of Origin: Jiangsu, China

Model Number: 1.56

Clear, Clear Lenses Color: Progressive Vision Effect: 12+2mm Corridor: Brand Name: kingway Certificate: CE/ISO Resin Lenses Material: HC.HMC Coating: Diameter: 70/75mm

Whatsapp, Skepe, Wechat, Email

## Packaging & Delivery

Selling Units: Pairs

Single package size: 50X45X45 cm Single gross weight: About 22kgs

Package Type: Inner: envelops;Outer: Carton; export standard or upon your design

Lead Time: Quantity(Pairs) 1 - 1000prs, 10days

Quantity(Pairs) > 5000prs, To be negotiated

### Semi Finished White 1.56 progressive shorter corridor 12+2mm optical lens

Refractive index	Corridor Length	Coating	Abbe Value
1.56	12+2mm	HC, HMC	38
Specific Gravity	Transmission	Monomer	Power Range
1.27	> 97%	NK55	SPH: 0.00~+-3.00 ADD: +1.00~+3.00

#### Features.

#### **SEMI-FINISHED LENS**

# What's the importance of a good semi-finished lens to RX production?..

- a. High qualified rate in power accuracy and stability
- b. High qualified rate in cosmetics quality
- c. High optical features
- d. Good tinting effects and hard-coating/AR coating results
- e. Realize the maximum production capacity
- f. Punctual delivery

Not just superficial quality, semi-finished lenses are more focus on the internal quality, such as precise and stable parameters, especially for the popular freeform

#### AR Coating.

--HC(hard coating): To protect the uncoated lenses from scratch resistance

- --HMC(hard multi coated/AR coating): To protect the lens effectively from reflection, enhance functional and charity of your vision
- --SHMC(super hydrophobic coating): To make the lens waterproof, antistatic, anti slip and oil resistance.

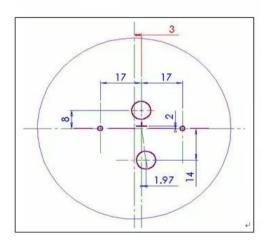

#### ine Advantages Of Progressive Lenses.

- --With progressive lenses, you won't need to have more than one pair of glasses with you. You don't need to swap between your reading and regular glasses.
- ---Vision with progressives can seem natural. If you switch from viewing something up close to something far away, you won't get a "jump" like you would with bifocals or trifocals. So if you're driving, you can look at your dashboard, at the road, or at a sign in the distance with a smooth transition.
- ---They look like regular glasses. In one study, people who wore traditional bifocals were given progressive lenses to try. The study's author said

## Progressive Short Corridor (M.S.OPTICAL Design-Magic)
